ALPHA-Clamp

With power curve and adjusting function, pneumatic selflocking type, connection compatible to size 50/63, stepless adjustable opening angle

APH 40.5 H BR2 A60 10° - 135°

Piston Ø Pneumatic self-locking type Clamp arm version A60: T12: Sensing system

Type

Ordering example Tünkers sensing systems:

... T00 ... T12 Without sensing Inductive sensor 24 V. 1 output with integrated LED's

Type Holding torque Clamping According to Weight moment at 5 bar piston Ø (mm) ~ (kg) max. APH 40.5 120 Nm 120 Nm

Attention:

External throttle check valves must be provided on assembly. They are not included in the scope of delivery!

Constant clamping moment in the angle range of ± 1.2°.

*Tolerance for dowel holes ± 0.02, for threaded holes ± 0.1.

Medium: Air, max. 6 bar, operation permitted with oil-free air.
