

Hook positions

Example for request:

KNL 40 UZ 1A30_45 LL T12R X=4,2

KNL 40 UZ: Type

1: Hook position

A: Pin form

30: Pin diameter "D1"

45: Height L2

LL: Air connection left (LR = right)

T12R: Sensing system right

(T12L = left)

X=4,2 sheet thickness "X"

Please send your request example to our design office.

After checking your request you will receive an individual article number for the requested Underbody Clamp.

Actual, transferable force (**) depends on pin diameter and geometry of the hook.

Attention!

External throttle check valves must be provided on assembly. They are not included in the scope of delivery!

* Tolerance for dowel holes \pm 0.02, for threaded holes \pm 0.1.

Medium: Air, max. 6 bar, operation permitted with oil-free air.

Ordering example Tünkers sensing systems:

...T00 Without sensing system
...T12L/R Inductive sensor 24 V, 1 output
with integrated LEDs

Туре	Holding force** at 5 bar max.	Clamping force at 5 bar	Weight ~ (kg)	L1	D1 Pin	L2 Height	X Sheet thickness
KNL 40 UZ	2500 N	2500 N		213.5
